

will bring **Crane Wars**  
to Bath in May 2013

Primary School Pupils will explore Bath's industrial heritage with Volunteer Engineers from local industry ...and then, with an Engineer's support, design and *build their own model Cranes* to compete for engineer's awards at Bath's Fringe Festival

Primary School Pupils in Bath are to be offered the chance to improve their collaborative and hands-on skills, learn more about the city's industrial heritage and explore their future.

Pupils will have the chance to find out about different engineering jobs and how they relate to science and technology learning in schools.

The volunteer Engineers have experimented and carefully planned their approach... they need some pupils to work with them!

**Where:** The Museum of Bath at Work

**When:** Week beginning May 20th  
Workshops run from 10am – 2.30pm each day

**Cost:** The majority of funding will be met by business sponsorship. Schools will be asked to contribute £100 per class.

**Contact:** Polly Barnes 0117 3290387

**What teachers say about My Future My Choice.**

"I have been on many school trips and activities and I can honestly say this is the best workshop I have been on....Carefully planned activities provided powerful learning opportunities for the children who showed amazing levels of engagement.... Sometimes its hard to get children to look forward and have high aspirations but the 'My Future My Choice Staff' are inspirational. Adults and children all went away with good feelings and new visions."  
**Stuart Parslow, Teacher, Avon Primary School**

"My Future My Choice is a great organisation. I worked with them and it inspired me to lead an 'Aspirations-Project at my School'" **Gemma Jackson, Principal of Minerva**
