

E

## civil engineer

My job is about how the roads you travel on and the buildings around you are built. I have to make sure that buildings don't fall down even if they are hit by an earthquake. I work on projects around the world.

Engineer

Q.

What other jobs could this person do?

E

# electronic engineer

I enjoy the challenge of finding new ways to do things. I work in communications on things like satellites and fibre optics. I specialise in wireless technology for things like your mobile phone.

Q.

Do you have the skills to do this job?

E

# mechanical engineer

## job details

I like to work with machines making things move. I particularly like cars which have lots of moving parts which need to be carefully designed. I would like to work on Formula One cars.

Engineer

Electronic  
Engineer

Q.

What would be the best thing about having this job?

E

# electrical engineer

I specialise in robotics, that is making computers behave like humans. I believe that in the future we will get more assistance from robot helpers and computers might even think for themselves.
